

COMPLETE TAX STRIKE TO MAKE YOURSELF INSOLVENT

This action consists in ceasing to pay all IRPF [*Personal Income Tax*], VAT, and/or all taxes for which you may have the opportunity as an action prior to generating a situation of irrevocable insolvency. Considering that not paying taxes is only a crime as from 120,000 euros in one year, there is considerable margin for disobedience without criminal risk and for leaving the system in support of a broad and mass process of social self-management.

Moreover, through your personal action, you'll be able to support other companies and cooperatives that are not insolvent by generating invoices so that their accounts balance out.

Always remembering that invoices must be real and that the payment thereof must be deposited in an account. Above all, it should be cautioned that the destination of the money is the key on which the ethics of any action of this type are based, and therefore, what is to be done with that money is the responsibility of each individual.
